MORTON'S REPORT

On Matters Pertaining to His Department.

HE INDULGES IN A ROSY REVIEW.

American Cattle Bring Good Prices in

English Markets—Export of American

Horses Steadily Increasing—Crop

Statistics More Satisfactory Than Formerly—

The Future of Farms and Farming.

WASHINGTON, Nov. 18.—Much space

is devoted in the report of the secretary

of agriculture to discussing the opportu-

nities for American meat products in

foreign markets. Of \$41,000 tons of

meat received at the London Central

market in 1894, 71,000 tons were Ameri-

can, while nearly 50,000 tons came

from Australia. The American propor-

tion has not been maintained during

1895.

In the imports of live cattle to Great

Britain, the United States and Canada

had a practical monopoly until the last

two years. Since 1894 Argentina's ship-

ments have greatly increased. During the

first eight months of the year shipments

amounted to over 25,000 head. Al-

though the meat of the South American

cattle is not as saleable as the American,

the business is profitable and likely to

increase. American cattle sell, though

slaughtered soon after landing, at prices

equal to the average paid for British

carcasses.

The export of American horses to

Great Britain has steadily increased,

having more than doubled since 1893,

amounting in the first eight months of

1895 to 22,735 head, valued at nearly

\$4,000,000. American geldings aver-

aged this year in the English market

export will be undertaken.

The foreign trade in dairy products is

carefully reviewed. In cheese the

United States, while a large shipper to

British markets, holds the conspicu-

PECULIAR STATE OF AFFAIRS

Feasibility That Murderer Jones May Yet

Escape Punishment.

WINCHESTER, O., Nov. 18.—Edward

Jones, the four times convicted Cleve-

land murderer, may yet escape both

the gallows and imprisonment without

another trial. The next trial will be

held in Brown county and is set for

Dec. 2, but it is generally believed that

another jury can not be obtained in

Brown county, where the last three

trials have been held. If a jury can not

be secured in that county it will be im-

possible to have a fifth trial and Jones

will have to be released.

Jones killed his son for marching in

a parade which was celebrating the

election of Governor McKinley four

years ago.

CHILLICOTHE, O., Nov. 18.—While

returning to his home near Hopetown,

Nelson Rayburn went to sleep in his

buggy. The horse in rearing to cross

the Norfolk and Western track in

front of a freight was struck and in-

stantly killed. When the trainman

stopped to see what awful damage had

been done to the occupant of the buggy

they found him still asleep, sitting in his

buggy, which had been broken at the

shafts and thrown around. When Ray-

burn was awakened he knew nothing

of the terrible fate he had just barely

escaped.

CONSTANTINOPLE, Nov. 18.—Latter ad-

northern Syria, confirm the accounts of

a massacre of Christians in that town

in the presence of 300 Turkish soldiers,

who did not render any assistance in

the suppression of the disorders. Ar-

other of burning the villages and of

other outrages which have occurred in

northern Syria.

The sultan has prohibited the entry

into Turkey of all papers containing ac-

LONDON, Nov. 18.—Sir Philip Currie,

British ambassador to Turkey, who has

been in England during the past month

in consultation with Lord Salisbury in

reference to the troubles between the

Turks and Armenians, started yesterday

morning for Constantinople via Vienna.

His journey back to Turkey will be

made in as short a time as possible, and

he will resume his post at Constantinople

without loss of time.

Lord Salisbury, accompanied by his

wife, went to visit the queen at Wind-

ABSOLUTELY PURE

DELIRIUM TREMENS

Brought Upon a Woman by Excessive

Use of Coffee.

FORT DONA, Ia., Nov. 18.—Mrs. Mur-

doch, living near this city, was attacked

with a severe case of delirium tremens

caused by the excessive drinking of cof-

fee. For a number of years she has been

addicted to the use of very strong

coffee, taking as many as a dozen cups at

a meal, and never fewer than six. Her

nervous system has suffered terribly.

She has made numerous attempts to

break herself of the habit, but without

success.

A few days ago she resolved to make

a desperate effort to give up the be-

verage, and for two days she fought the

insatiable craving. At the end of the

second day came the collapse, and she

suffered every symptom experienced by

a heavy drinker of alcoholic liquors

when deprived of it after a prolonged

debauch. The physician called stated

that she had delirium tremens, and

could hardly be convinced that the pa-

tient had never touched alcoholic stimu-

lants in her life. When the case was

explained he pronounced it the most re-

markable one he had ever heard of.

This case doubtless will become a fa-

mous one to the medical world.

REFORMS IN CUBA.

General Gomez Within Easy Distance of

Spanish Headquarters.

MATIN, Nov. 18.—It is reported that

General Campos is about to introduce

numerous political reforms into Cuba.

Advised received here from Havana

state that General Maximo Gomez, the

insurgent leader, is now within five

hours' marching distance of General

Campos' headquarters.

Heraldo's Havana correspondent says

that General Campos denies all reports

of any armistice or any suspension of

hostilities against the Cuban insurgents.

Reports have been received here stat-

ing that during the last voyage of the

steamer Catalina to Havana, 170 con-

victs and 300 volunteers multiplied and

tried to capture the vessel. The mar-

riages succeeded in suppressing them.

After a severe conflict, in which many

were wounded, twenty of the principal

culprits have been sent back to Spain.

## MARION CHURCHES

ATTRACT LARGE AUDIENCES TO THEIR SUNDAY SERVICES.

Brief Reference Made to Sermons and Services of the Day—Items of Interest to Church Workers and Religious Workers of the City.

Rev. J. W. Armstrong spoke to a splendid audience Sunday morning at St. Paul's Episcopal church, taking his text from Romans 5:12, "Wherefore as by one man sin entered into the world and death by sin, and so death passed upon all men for that all have sinned."

The speaker showed that the doctrine of justification by faith and then went on to show the universality of salvation in Christ proved by the universality of death in Adam. He then showed that we don't die a natural death of our sins for that came in through the sin of Adam to the whole race.

We know that death was in the world before the fall of Adam, know that it was in the domain of animal life, therefore death to humanity through Adam. "Whereas in Adam all die, even so in Christ shall all be made alive."

In the evening the speaker gave an exposition of the gospel for the day, St. Matthew 5:12—"Then went the Pharisees and took counsel how they might tangle him in their toils."

An unusually large congregation greeted Rev. J. L. Hillman at the Epworth M. E. church Sabbath morning, while the evening attendance was fairly good.

In the morning Mr. Hillman took his text from St. Matthew 6:9, "Our Father who art in heaven," the text being the first half of the verse. In the evening the text followed was the latter half of the same verse, "Hallowed be Thy name."

The sermons were two of a series in the Lord's prayer and were of wonderful worth as sermons of striking interest and deep thought.

Sabbath afternoon at the Young Men's Christian Association meeting Rev. C. W. Howe, the prohibition orator, has been delivering lectures at the court house in the cause of Prohibition, delivered an eloquent sermon to a good sized crowd.

The speaker took for his text, "Keep thyself pure and be not partaken of other men's sins," and upon that built a sermon on "Christian Purity" which was not only highly interesting and entertaining but also stirring in the highest degree.

Rev. A. L. Nicklas preached at the Evangelical Lutheran church both morning and evening, Sunday. At both services the sermons were in English and were listened to by good congregations.

In the absence of Rev. Alexander Bartley, at the State Street Baptist church, Deacon Grove preached a short but interesting sermon in the morning. There were no services in the evening.

At the morning service of the Epworth M. E. church three members were taken in by letter and in the evening five were taken into full membership and two on probation.

Rev. B. F. Durr preached to goodly sized congregations both morning and evening at the United Brethren church. This church is growing under Rev. Mr. Durr's pastorate.

The services at the Epworth M. E. church next Sabbath will be conducted by the Woman's Home Missionary society.

## REV. HODGES DEAD.

A Well Known Minister's Death Occurs at Marysville.

The many friends in this city of Rev. W. J. Hodges, pastor of the Methodist Episcopal church of Marysville, will be pained to learn of his death, which occurred at that place last Saturday.

Mr. Hodges was a victim to typhoid fever and passed away after a few weeks' illness from that dread disease. He left a wife and one child.

Tool House Robbed.

Friday night thieves broke into the tool house of the Chicago and Erie railroad at DeCliff. They stole a number of tools, among them being crow-bars, wrenches, etc. There is a supposition that they were professional thieves, who needed the tools in their business.

## DENOMINATIONAL NAMES.

The Baptists have their name from St. Paul, their founder.

The Wyclifites took their name from Wyclif, an English reformer, born 1324; died 1387.

The Servites are a religious order founded by seven Florentine merchants in 1283.

The Adamites, a sect of the fourteenth century, were named from one Adam, who called himself Adam, the Son of God.

The Lollards, a sect of reformers, were named from Walter Lollard, of Lollard, who was burned for heresy in 1387.

The Benedictine monks had their name from their founder, St. Benedict, who brought the monastic system into Europe about 529.

The faith healers were thus called from the fact that they claimed by the exercise of faith and prayer to heal all manner of diseases.

The word nun is derived from the Italian word *nonna*, meaning "grandmother." When nuns were first instituted, the inmates were all very aged women.

The word Catholic means "universal," and the name Catholic church simply means "universal church," as for many centuries the Catholic church was the only church.

The Nonconformists were thus designated from their refusal to conform to the usage and doctrines of the established church of England. They were also called dissenters.

The Pharisees mentioned in the New Testament took their name from the Hebrew word meaning separated. They were so called because they considered themselves better than the other people of that time and separated themselves from them.—St. Louis Globe-Democrat.

## STAGE GLINTS.

Edwin Gordon Lawrence will return to the stage next season.

Miss Pons, who has permanently retired from the stage, lives now in Washington.

Edwin Stevens has left the "Sphinx" company and will join the Mario Jansen company.

Ithaca's new play, "Nell Gwynne," by Paul Kester, has proved to be her most successful vehicle.

The new review which is being written for the New York Casino will be called "The Kaleidoscope."

A daughter of the late Mrs. Trebelli is to visit Australia with a concert company, as is also the veteran Sims Reeves.

Nat Goodwin has put Sydney Rosenfeld's play, "A House of Cards," in rehearsal. He will produce the play this season.

A new prima donna, described by the critics as wonderful, has just made her debut in St. Petersburg. Her name is Helene Chevre.

"The Reckoning," a melodrama in four acts, will be produced at the Park theater, Brooklyn, on Jan. 27 for the first time in this country.

The fancy comedy upon which Fred Williams and Benjamin F. Roeder have been at work for some time is to be called "The Cuban Girl."

Nellie Braggins has resigned from the "Bury of the Hill" company and will sing the role of Priscilla in "The Patriots" soon to be done at Atlanta.

"The Gay Parisians" will be produced in London next spring by Charles Frohman, with a cast including four of the actors now appearing in the comedy.

George Leitch is making a success with "The Land of the Moa" in New Zealand. The syndicate backing it is so satisfied that it intends to take the drama to England.

## NYE AND THE INDIANS

SOME SOCIAL NOTES GATHERED AT THE WILD WEST SHOW.

Interesting Gossip About Buffalo Bill, and a Story About Colonel Cody and Colonel Cockerill, a Mamma Bear and Several Acres of Dogs.

(Copyright, 1895, by Edgar W. Nye.)

The Wild West show is now touring the south for the first time, and we have a chance to see our long-lost brother, Shasta Peterson of Dakota, and his kinsmen in Dixie.

The day was quite odd, and a stiff autumnal breeze from the mountains came down and sought out the warrior who had forgotten to put on his topcoat of paint. Billy B. Dan, the Ogallala chief, looked well in a beautiful line of dress, given him by his majesty. He also wore a jacket containing a lock of hair from an old settler in Nebraska.

Spirits, Frumment, the big brute chief, appeared in a new varnish and wild goose pimples. He is not drinking.

After a few miles the spot became more distinct, and to the old scout the signs of a hot chase were unmistakable. Every little while one of the little boys would sit down in the soft snow to make a death mask of himself or rest and think.

As Cody called attention to these ever increasing traces of the nearly gone party became more silent, the colonel said, and by and by, as every eye was strained up the canyon in the direction of the tracks, Cockerill said:

"Bill, where does this little canyon on the left lead to?"

"Oh, it takes you away off our course. It runs due south."

"Well, I guess I'll take it," says Cockerill, with a pale smile. "Don't wait for me. This is just what I've been looking for if it takes me off my course. The farther I get from my course the better I'll feel."

He met them again at dinner time much refreshed by his center through the sagabash and his communion with nature.

There were two jockeys with the party, says the colonel, and when the attack was made the old mamma bear got after them. For awhile she was quite a favorite against the field. The jockey in the lead looked back and saw that the lady bear was just at the gambels of his partner's horse.

"Put the bid to him, Jim," says the head rider. "Pound him on the back of the bear'll take the stakes." (Doubtless also some of the tenderloin and a bit of the round.)

"Stakes be d—d!" said the breathless Jim. "Do you think I'm trying to throw this race?"

Once at the foot on the border Colonel Cody found when he arrived with a hunting party that at the post every body had from one to eight dogs. Every kind of dog known to the pharmacopeia was there. He never had seen so many dogs together in time of peace.

So he said, "I'll tell you how we can utilize these dogs."

"Thank you," said the commandant, for he was "plumb wore out" with these dogs, all dependent and so far from home and eating into the vitals of the government.

"Well," says Bill, "we will tomorrow organize a vast wolf hunt, and we can thus have fun and also perhaps shed a few of these dogs on the way."

Early the next morning an old hunter dropped into the post with a huge hyacinth wolf—sort of a cross between a wolf, with two to six feet.

"What do you ask for it?" said B. Bill.

"Eight dollars and a pair of pants," says the hunter. "I have to wear overcoat in society now. I can't do better."

A LASS OF FEINTS.

just about dusk last evening and didn't get him much, but I need a new pair of pants."

The money was paid. "And now," says Cody, "we will see the old girl lose about half a mile away after the dogs have sampled her bouquet a little, and then we'll take after her."

So everybody mounted a steed of some kind, and as they went over the world and the gods, and the moon, and the paddock, and the beach, and some more times like that—two acres of equine trans and three acres of dogs.

As the first three dogs came up to the wolf she turned, swiftly and so moved to bite the whole three dogs at once, as a wolf will, being quicker than all get out, as Matthew Arnold says so fittingly somewhere.

Well, each dog panned and looked sort of sad and disappointed at each other, as such a case, "Did you do that?"

Then they seemed convinced that such was the case, and in a minute it seemed, maybe less, there was a mass of quivering dog fight there that shook the earth. More dogs were added as things happened, and then the men came along.

One man says: "Boys, by the Great Big North American Jehoshaphat, that dog don't! That big bull and the sutler's dog has got mine by the throat." And he got off and kicked the sutler's dog.

The sutler got off his horse and stepped the under dog owner in the face and said: "Look here, don't you kick my dog that way and cloud his whole life—don't! Take some care of your size."

At this the other man turned upon the sutler for post trader, or whatever he is, that sells whisky and loans money to carry on the war, and snatched a "year of whiskers" out of the sutler and at the same time kicked him right in the very center of his being.

Then an officer says: "Look here, you d—d shave tail" (an epithet applied to new government mules and West Point graduates), "you can't kick a person in the abdomen that way." But before he got the words out of his mouth another officer told him to shut up, and he hit him across the jaw with a rawhide quirt.

Then there was a general fight—two acres of men and three acres of dogs—and the air was full of discontent and bits of wearing apparel and blood and features floating through the air, while far, far away, hitting the horizon for a time to time with her willowy figure and accumulating a wider intervening distance, the frothy jaws of the advanced officer widened into a sickening and more dire and awful smile as she seemed for an instant only a dull, gray optical illusion, and was then gone forever.

Bertie's Letter.

DEER MISTY EIDER—The kweshun, "Will women ever too the front?" was adjured at our horse last night. We had some company from Boston, and they held quite a discussion.

Dad said if women want two waist pants let 'em, and if they are capable let 'em vote. And he also said if their was a big war with England let 'em shoulder a ruskit and follow the band. Ever since I was born my ma has been supream boss of our household, and I think she has run things better'n dad could. But I kallerbet it will be sun time afore woman can wear a flowin beard like Senator Puffer and other grate politicians. Meast woman folks have a gift of gab superior two most men. They can talk and talk on fashion and other trash, but whether woman will be able to shut off that wind for hours over Nashua Ishew's hasn't been decided. Lots of men are tann as kittens at home, but when they get excited about politics they rip right out cuss and swear. When their wives get suffrage, they dancet carry on sew.

Sum times after a corkus or a grand rally the boys go toward the corner and fill their flowin hole. Sum of 'em cut up like Sezar and go off on a mid night best. When woman have equal rights, won't there be jelly in the tanks. Won't man will jag down the street with sun on else wife. And their will be weepin and wailin and nashin of teeth. Oh, Mister Eider, wot are we cumin too? The woman will be gunze. Althot chits and whoop her up two the top knoth. There won't be room for a outspizin young man like me anywere in the universe. I suppose I will have forever an orcid bachelor coz woman will be two bity too go Jus-band hunting. Owd the owd skule marks will join the phoze force, and New York will be kwader than Adelaidefar. IRVING, ACTOR. English Player's Failure as Macbeth. HENRY IRVING IS INADEQUATE. THE TWO ARTISTS IN ONE. The Greatest Tragedies—Mr. Irving Compared With American Actors Have Evidently the Role.

It is a metaphysical study. This straining for effect, even if exerted in the right direction, is painful, but when improperly applied it is exhausting to auditor as well as actor, and that is precisely the effect of Mr. Irving's impersonation of Macbeth.

Ellen Terry, admirable in everything else in which I have ever seen her, is very bad, and totally unconvincing as Lady Macbeth. In her last moments she barely suggests the possibilities of the character in the hands of an actress suited to that line of work. Miss Terry is at one moment Rosalind, at another Marguerite, at another Juliet, but Lady Macbeth—never. She does not possess by half the force necessary to properly play the part and cause the audience to sympathize with, or at least appreciate, the workings of a nature consumed by ambition, which in order to gratify its lust of power is able to display at will the velocity of a steam engine, the subtlety of a spider, the cunning of a serpent, the ferocity of a lion, the cunning of a fox, the cunning of a cat, the cunning of a dog, the cunning of a man.

henry Irving, who is a highborn man, the cunning Duncan, and this cunning person whom he must have with a loathing, despite the imagination which forced him to make them, is therefore out of place—a black spot upon a beautiful canvas. ALL SORTS OF SPORTS.

The value of the prizes to be given at the San Francisco horse show in December will be \$20,000, only \$10,000 less than the prizes at the New York show.

The famous Jewett farm stud is to be broken up, and one of the most sensational sales of trotters of the year will be the result.

F. W. Freeborn of last year's Henley crew has been elected captain of the Cornell university crew for 1896.

Rey del Carrero and Sir Excess, two of the prominent thoroughbred handicapped horses of this country, have been sent to England, where they will be campaigned by Richard Croker.

Tommy Britton, 2:15 1/2, 2-year-old champion race record, is the latest star in the Electioneer Beautiful Bolls line.

For the number of horses started Billy Andrews, with the Empire City stud stable, marks among the greatest winning drivers of 1895.

There are about 10 Trillies, one dozen Svangals and 13 Trillies on the turf. McGaffery, the owner, can claim precedence over Du Maurier, however.

The Daily Telegraph has sent Dr. W. G. Grace, the great English cricketer, a check for \$25,000, representing 100,000 shillings subscribed through that paper as a testimonial of esteem for the veteran player.

In addition to this sum it is understood that the Marylebone Cricket club has in its hands several large and small amounts subscribed for the same purpose.

NINE ON ONE BICYCLE.

Wonderful Wheel That a Californian Is Constructing.

A MILE AT A MARVELOUS SPEED.

The New Nonaplet, as the Inventor Terms It, Will Be Made of Aluminum and Will Be Geared to Two Hundred and Twenty Feet—What the Machine May Do.

When the tandem was built a number of years ago, it was looked upon as a remarkable development of the bicycle, and the two riders skimming along over the road attracted almost as much attention as a small circus parade.

Many persons did not believe the frame could be made strong enough to support four heavy wheelmen, but the machine was constructed and proved a great success as a racing machine.

It was not quite generally believed that the "quad" was the longest bicycle that could be built and operated successfully, but P. J. Berle very recently demonstrated that the opinion was not well founded.

He constructed a quintuplet which carried five riders, but had only the usual number of wheels.

It proved a valuable addition to the racing machine, and was encouraged by its success a California inventor is building what he calls a nonaplet, which he expects will carry nine men and display unprecedented speed on a straightaway course.

The inventor's name is Albert Thompson, and he is a resident of San Francisco.

LIPSCHUTZ AND SHOWALTER.

Famous Experts Who Are Battling For the American Chess Championship.

For the second time Samuel Lipschutz and Jackson W. Showalter are contestants for the chess championship of the United States.

Samuel Lipschutz, of New York, is a native of Hungary and has been a resident of the United States for about 15 years.

He is 35 years of age and has such poor health that he has devoted most of his time for the past three years to resting and recuperating.

Showalter is a Kentuckian and has the most overpowering mastery of any chess expert living today.

FOUR CLEVER FOOTBALL CAPTAINS.

Henninger, Van Dozer, Richards and Camp. All Have Strong Eleven.

The University of Michigan team, captained by E. W. Henninger, is one of the strongest football eleven in the west.

Another strong organization is the Northwestern university eleven, captained by J. P. Van Dozer, which recently defeated the Chicago university with ease.

Van Dozer is said to be one of the best football players in the west. He is about 5 feet 10 inches tall, weighs 180 pounds and has been a member of one of Uncle Sam's life-saving crews.

GOLDEN DISCOVERY.

The invention of Dr. E. V. Pierce, chief consulting physician to the Laval Hotel and Surgical Institute, at Buffalo, N. Y., has, during the past thirty years, made a record in the cure of bronchial, throat and lung diseases that fairly entitles it to out-rank all other advertised remedies for these affections.

It is a cure for consumption, in all its early stages, and is cured by Dr. Pierce's Golden Medical Discovery, even after the disease has progressed so far as to induce repeated bleedings from the lungs, severe coughing with copious expectorations (including tubercular matter), great loss of flesh and extreme emaciation and weakness.

You doubt that hundreds of such cases reported to us as cured by "Golden Medical Discovery" were genuine? THE MONAPLET, A BICYCLE BUILT FOR NINE RIDERS.

GOSSIP ABOUT THE KICKERS.

Walter Camp, the "father of football," is coaching the Stanford university players in California.

Newell brought out a strong eleven at Cornell last year, but this season the Ithaca collegians have been slow in getting into form.

The Tigers are not in the best of shape, but Captain Len has the making of a good all-around team, and with proper handling Princeton should be able to hold her own against Harvard and Yale this year.

Coaching football teams is the latest American industry. It is a business that requires a college education, but it is extremely remunerative.

As usual Yale furnishes more coaches this season than any of the other big colleges, and Harvard is next.

BRIEF NEWS ABOUT BICYCLING.

A big bicycle meet is talked of to take place within the boundaries of the Atlantic exposition grounds during the first week in December.

Zimmerman, the champion bicycle rider of the world, has arrived at Melbourne, Australia, and has gone into active training for the new season which will begin in the latter part of November.

John S. Johnson, the Little Wheelman, in a series of past races—some five and ten miles—for a purse of \$1,000. Efforts will be made to have Michael come to this country.

The oldest member of the League of American Wheelmen is H. M. Carter of Hyde Park, Mass. He was 69 years old last month and has been an enthusiastic rider for nine years.

A. H. Overman, a prominent bicycle rider, believes there will be an overproduction of bicycles next year, but he says that high grade wheels will sell at \$100.

**FAYE'S COMET.**  
Flammarion Talks of the Much Discussed Star.  
M. Camille Flammarion was seen at the Juvy observatory by a correspondent in reference to a comet that had been raised as to the identity of the comet discovered by Professor Javelle and stated to be Faye's comet.  
"It is the comet," said M. Flammarion, "that Faye discovered in 1843 at Paris."  
A revolution of this comet around the sun takes place every seven and a half years. Its orbit is perfectly determined. The position in which it is traveling is well known and it will be found in conformity with the calculations which have been made and published.  
Of course Faye's comet must not be confused with that of Encke, which makes a revolution every three years and which has not the same orbit in the heavens.  
The extreme distance of Faye's comet from the earth and the sun is 891,000,000 kilometers. It will return to view in 1904.  
Faye's comet, when found (not discovered), Sept. 26, 1895, showed a R. A. of 317 degrees 2 minutes 52 seconds, and its declination 1 degree 54 minutes 14 seconds.  
This comet is now very feeble and cannot be distinguished except with the most powerful telescopes. We have instruments here strong enough to discern it. I saw it on Sept. 30 last. I found it without a tail, round and a pale nebula—just a little atom of smoke. We can see it with a telescope for several months.  
In speaking about comets, you may like to know that Halley's—the most famous of all comets—will appear in 1911. This is five milliards of kilometers from the sun.  
You remember having read something about this comet in your school days, do you not?" said M. Flammarion smiling. "It played, you remember, an important role in the conquest of England by William of Normandy at the battle of Hastings in 1066. You know this comet was regarded by superstitious ones in England as a judgment of God, and it was said by some that the crown of England was snatched from the comets' tail. The design bringing out this idea is cleverly traced in the tapestry of Matilda, wife of William the Conqueror, which, as every one knows, is preserved at the venerable cathedral of Bayeux."—European Edition New York Herald.

**BUILT ON A LAKE.**  
Wichita, Kan., Said to Be Over a Subterranean Body of Water.  
The singular discovery has been made that the city of Wichita, Kan., is built on a subterranean lake. A prospect well is being drilled at the expense of the city to find out whether coal, oil or gas is within reach. To the surprise of all, except a few old citizens who have for years entertained the pet theory that Wichita was built upon what they were pleased to term a floating island, it was found that underneath the city is a sheet of water 35 feet in depth.  
The striking of this great body of water at the point selected by the committee for making the investigation is no accident. This is the third well sunk in Sedgewick county that has revealed this condition. The drill, after reaching the bottom of the lake, struck a stratum of blue clay of such firm consistency as to render it impossible for water to flow through it. The flow of water, when the lake was struck, was so strong that it was impossible for the pumps to have the least effect. Water tight tubing has been put down through the lake and buried firmly in the clay. This completely shuts out the great flow of water, and the contractor will make rapid progress from this time on. The well will go down to a depth of 3,500 feet, if nothing of a valuable nature is found this side of that distance.—St. Louis Republic.

The beautiful Cleopatra shades in bronze, tawny brown, chestnut, golden, olive and Havana—a rich russet brown—and all the deep reds and dahlia dyes are in the highest favor this season.  
Full medium length evening capes of brocade are preferred by very many women to the elegant enveloping long cloaks, as the former do not crush the dress skirt or its trimmings of lace, ribbon, etc.  
Among the expensive coat baggies for special wear are these made of rich Persian patterned ladies' cloth; also those of dark velvet in green, plum, black or olive, nearly covered with brilliant foliage and flower clusters, or single blossoms and leaves.

**Valuable Collection of Stamps.**  
When a collection of postage stamps owned by James N. Paul, Jr., of Philadelphia was insured, it was stated that it was the most valuable in the world. "While Mr. Paul has, beyond a doubt, a fine collection," said a stamp expert, "there are, in all likelihood, hundreds of other collections that far exceed his in value. For instance, there is the collection of Philippe de la Bonette Perrier of Paris. Of course it is impossible to estimate exactly such a collection, but that one has been valued at from \$1,000,000 to \$2,000,000. It is left to the members of the Late E. K. Tappan, member of parliament for Lancashire. The state of Maine boasts of a collection that is worth at \$200,000. The city of Cleveland has another that is valued at from \$75,000 to \$100,000, and there are many more that I cannot now recall. It is a curious hobby, that of collecting postage stamps, and it would surprise a people who are not interested in it to know the amount of money that is invested in postage stamps."—St. Louis Globe Democrat.

**RAILROAD NOTES.**  
The brotherhood of railroad trainmen has decided to remove its national headquarters from Galesburg to Peoria. This makes Peoria the headquarters of the trainmen, the railroad telegraphers and the locomotive firemen. The officers expect to complete the removal by December 20.  
Arrangements have just been perfected for the publication of a monthly devoted to the interests of the Erie Lines, the Columbus,ocking Valley and Toledo and the Norfolk and Western, the first issue to appear January 1. For several months this plan has been in the mind of W. H. Fisher, general passenger agent of the Buckeye route, and now that the co-operation of the other lines in the through service from Chicago to the sea-board via Columbus, has been secured, the publication will soon materialize. The plan is to have the publication take the place of the time tables and with the additions of fine illustrations and reading matter, to make the publication of sufficient interest to the public to secure the attention of advertisers along the line of the three systems. It will bear the appropriate title of "The Triad," in recognition of the three lines issuing it, and will be issued from this city.—Columbus Dispatch.  
Columbus Dispatch: In speaking of record-breaking runs, many of which have been made on Columbus lines in the past few months by the fast trains arriving at this terminal, a railroad man made the remark that as a rule they could not be done and the engineer obey the state law, city ordinances and the book of rules. He claimed that to make fast time it was necessary for an engineer to run through the towns which by ordinance regulate the speed of trains, and ignore such restrictions, thereby entailing the risk of arrest, or else run a railroad crossing in violation of the state law and invite the danger of a collision. Especially when others of the road are on the engineer makes an effort to show a good record on the train sheet and even when they are not he is expected with the fast trains not only to make his own time but make up time lost on other divisions or at a terminal. Such trains are scheduled at a rate that an engineer can make by keeping right at it all the time, but when a train is turned over to him a few minutes late he is expected to make the time or the officials want to know the reason why.

**An Epidemic of Toothache.**  
One of the most curious features of the Chitral campaign was the extraordinary prevalence of toothache among the officers. The matter is receiving the serious attention of the medical authorities, and it is hoped that some very interesting statistical results will be gained from the careful investigation which is now taking place. The epidemic first made its appearance after the active operations were over and the various regiments had received orders to stand fast for the summer, and reached its most violent form just before the long expected order to partially evacuate the country had arrived. Is not an epidemic of toothache something very unusual?—Pall Mall Gazette.

**Snow Men Alarmed.**  
Great excitement prevails in the Chicasaw Nation over the passage of a bill by the legislature daily repudiating "intermarriage" citizens of this nation—that is, white men who have married squaws—and declaring them as citizens, without any rights whatsoever.  
The bill not only disenfranchises them, but takes away their rights, heretofore unquestioned, of holding land in the nation, participating in annuities, and to government funds held by the United States and holding any official position under the Chicksaw government.

A heavy guipure sailor collar, with squared ends, and the Marie Antoinette ruffled fichu are the two latest novelties in the way of brightening up a somber toilet.  
The beautiful Cleopatra shades in bronze, tawny brown, chestnut, golden, olive and Havana—a rich russet brown—and all the deep reds and dahlia dyes are in the highest favor this season.  
Full medium length evening capes of brocade are preferred by very many women to the elegant enveloping long cloaks, as the former do not crush the dress skirt or its trimmings of lace, ribbon, etc.  
Among the expensive coat baggies for special wear are these made of rich Persian patterned ladies' cloth; also those of dark velvet in green, plum, black or olive, nearly covered with brilliant foliage and flower clusters, or single blossoms and leaves.

**The Peralta Land Claims.**  
The decision of the court of land claims at Santa Fe that the renowned Miguel de Peralta, a son of the Colorado, is a principal of the same name as Sarracamp's friend Mr. Harris, and that the same said have been made to him and his heirs, will perhaps dispose of one of the most extraordinary of the land claims in the southwest. The establishment of this tribunal by congress was an excellent piece of work, and gradually the titles to real estate in New Mexico and adjoining regions will be freed from the tangle of the last 40 years.—New York Sun.

## DEATH'S HARVEST.

J. WHEELER WOODRUFF SUCCUMBS  
AFTER A LONG SIEGE

He Dies This Morning at the Home of  
His Father on East Church Street.  
Three Other Deaths Complete the Day's  
Record.

James Wheeler Woodruff died at 2  
o'clock this morning at the home of  
his father, J. J. Woodruff, east Church  
street, aged 23 years.

Mr. Woodruff's sickness, a complica-  
tion of liver and kidney trouble, dates  
back eleven months, which have been  
marked by alternating hope and fear  
on the part of those to whom his life  
was dear. There was great suffering,  
which was borne patiently by the af-  
flicted young man, who battled bravely  
for life, never giving up the unequal  
struggle until a few days before his  
death.

Deceased was married in June, 1894,  
to Miss Mary Beckenberger, and they  
at once established a comfortable little  
home on Cummin avenue, where they  
lived happily and looked hopefully to  
the future to bring them the rewards  
of persevering industry. Months of  
sickness on the part of the husband  
soon followed and he was finally taken  
to the home of his parents, that they  
might be better able to assist the de-  
voted wife in administering every pos-  
sible attention. Medical skill was ap-  
parently baffled in rendering any per-  
manent assistance, and the hope that  
the young man might recover was soon  
succeeded by despair.

Funeral services will be held Tues-  
day afternoon at 2 o'clock, from the  
residence of deceased's father. Rev.  
J. L. Hillman will officiate.

Death of John Lyons.  
John Lyons, who is well known in this  
city, and has resided just east of the  
fair grounds for years, died Sunday af-  
ternoon at 2 o'clock. He has been a  
familiar character on the streets here  
for many years. He has been a sufferer  
from many of the infirmities of ad-  
vanced years for some time, which re-  
sulted in his death.

The funeral will occur from St.  
Mary's church Tuesday morning at 8  
o'clock.

Death at Espyville.  
Jacob Miller died at his home in Es-  
pyville Sunday, at the age of 72 years.  
Miller had been suffering for some time  
with old age, and the diseases that  
come with it. He leaves a family of  
children, and had a wide acquaintance  
in the neighborhood in which he resided.

The funeral occurred from the Pleas-  
ant Hill church this afternoon at 2  
o'clock.

An Infant's Demise.  
The two-weeks-old child of Mr. and  
Mrs. Charles Meyer, residing southeast  
of this city, died Saturday from the ef-  
fects of lung fever.

The funeral occurred from the house  
Sunday afternoon at 1 o'clock.

COMMON PLEAS COURT

In the case of Elizabeth J. Wyatt  
against Watkin Watkins and others,  
defendant Isaac Eberly, by his attorney,  
J. L. Dickey, filed his answer in the  
court of common pleas this morning.

In his answer Eberly sets up a judg-  
ment secured before J. H. Gast, a  
justice of the peace of Prospect town-  
ship, Sept. 5, 1891, for \$250 with inter-  
est at 7 per cent against Watkin Wat-  
kins, T. U. Watkins and T. P. Watkins  
and asks that his lien may be protect-  
ed, and that, in event said premises de-  
scribed in the petition are sold that his  
lien may be paid in the order of its  
priority.

An appeal transcript has been filed  
in the court of common pleas from the  
justice court of J. E. Osburn, in the  
case of Monnett against Seefeld and  
others.

A transcript was filed in the court of  
common pleas, this morning, from the  
justice court of Geo. McKinley, in the  
case of the State of Ohio on complaint  
of C. C. Jones against Barney Narrance,  
charged with stealing four cases of  
shoes and other merchandise.

Jacob Findling, by his attorneys,  
Crissinger & Quigley, today filed in the  
court of common pleas his reply to the  
answer of the defendant in the case of  
Findling against Findling.

In his reply the plaintiff, admitting  
that he is the owner of lot 2405 in  
Leonard's addition to Marion, and that  
he owns certain personal property, says  
that said real estate is encumbered to  
the amount of \$900.

The plaintiff, setting up the fact that  
the defendant left their home without  
fault on his part, says that the de-  
fendant has been guilty of frequenting  
places where it was highly improper  
for a married woman to go and denies  
that he sought to secure defendant's  
property or that he ever received from  
her \$210 or any other amount.

The case of Crawley & Scanlan  
against the city of Marion came up in  
the court of common pleas, this morn-  
ing, for trial before a jury.

An equity proceeding coming up in  
the case the jury was excused until 1:30  
o'clock this afternoon, and at that time  
again recessed until tomorrow morning,  
the court meanwhile hearing the  
equity part of the case.

## CHRYSTANTHEMUMS.

Beautiful and Rare. To Be Shown at the Presbyterian Fair.

Friday afternoon and evening of this week the Y. P. S. C. E. of the Presbyterian church will give a charming entertainment in the way of a chrysanthemum show.

Those who were present at the show of chrysanthemums last year will not forget the beauty of the display, and the statement made by the society that the present show will be on a much larger and more pleasing scale will indicate to them the extent and magnitude of this season's affair.

The flowers shown will be the most choice, largest and the selections the most varied which the market can afford, while the program to be rendered by the orchestra will without doubt please all who go to hear and see.

During the evening light refreshments will be served.

## She Will Recover.

The indications now are that Betsey Munson will recover from the effects of the accident of last Friday evening, although she will be a cripple for the rest of her life.

The knee cap was splintered and smashed and at least thirty pieces of bone were removed from the wound and so the knee will be stiff when she attempts to walk again.

Besides the injury received to her knee, Miss Munson received an injury to her head, the bones on the left side of her head being depressed. Her spine was injured also, but despite all these injuries it is probable she will recover.

## Fine Art Needle Work.

There will be a display of art needle work at the Hotel Marion Tuesday and Wednesday, November 19 and 20, consisting of finished embroidery, linen, silks, stamped linens, commenced work, sofa pillows, table covers, bed sets, etc., and all the latest novelties for the holiday season. The ladies are cordially invited to call and inspect our beautiful display.

## THAT ARSON CASE

Wherein Frank Grubb and Michael Tonguet Were Indicted.

The indictments returned against Frank Grubb and Michael Tonguet by the grand jury and made public last Saturday, were for the burning of the house of Michael Tonguet at Kensington Place, April 29 last.

It seems that Tonguet had his wife insure their home, worth about \$300, in the Phoenix Assurance company for \$400 and then transfer the policy to him.

He and Grubb are now indicted and under bond for burning the property to get the insurance, Grubb being charged with setting fire to the house at the instigation of Tonguet.

It appears that Grubb's conscience troubled him, and going before a justice of the peace, in the country, made a statement of the circumstances, which resulted in the case being brought up before the grand jury, with the above result.

## Consolation for Gallion.

[Gallion Leader.]

A prominent officer of the Erie, one who is in close touch with the president of the system, was in this city a few days ago and spoke most encouragingly of the prospects of the road, and incidentally gave it as his opinion that Gallion's prospects were never brighter so far as the road is concerned. While the official referred to has always treated our local interests with the utmost consideration he never felt that it was policy to make Gallion divisional headquarters from a business standpoint. His view is changed now. He thinks Gallion is all right. The building of the commodious new depot, the enlarging of the yards and the construction of the mammoth reservoir together with other improvements has convinced him that the Erie's betterments in this city are practically the best on the road. He was quite positive in his declarations that this city would continue as division terminal, and that the yard and shop facilities would be increased. Gallion is all right.

## VERY MUCH WANTED

IS BARNEY NARRANCE. NOW IN THE COUNTY JAIL.

He is Under Bonds To Appear in the Crawford County Court--His Presence is Also Desired in Richland County. Barney Belongs To a Gang.

Detective Little, of the Erie railway, came over from Mansfield this morning to make inquiries in regard to Barney Narrance, who was arrested here last Thursday evening by Detective Jones, of the Big Four, for stealing shoes from that company's cars.

While Mr. Little was making inquiries of Prosecuting Attorney Mosser, to learn of the strength of the case against Narrance, Justice McKinley filed a transcript from the mayor's court, in which it is recorded that that individual pleaded guilty to larceny before the magistrate and he is now lying in jail biding such time as his case will come before the grand jury, which will not be until next February.

Mr. Little had in his inside pocket a warrant for Narrance, which was issued in Mansfield last April and which charges the festive Barney with breaking into Erie cars at that city now nearly a year since. If the fellow had no engagements that would keep him here it would have been the detective's desire to solicit his presence over in Mansfield.

But these two cases are not all. Narrance is already under bond to appear before the Crawford county court to answer to a charge of stealing from the Erie. This case has been pending ten months, Narrance being able to enjoy his liberty through the providential fact that he has a father at Gallion in such circumstances that his signature to a bond for his appearance is considered good by the court.

Detective Little says that Narrance belongs to a gang of clumsy sneak thieves who have been looting the railroads of goods for some time. Their headquarters are at Gallion. The gang numbers an half dozen, nearly all of whom are under arrest.

It will be remembered that Narrance told a pitiful story in the Mayor's court here in extenuation of the offense he had committed. He said that he had been inveigled out the Big Four track under the promise of a stranger that he would be given a pair of shoes to cover his poorly-shod Tibbys, but when the detective found him he had nearly enough footwear in his possession to give the Leather Trust a case of well-defined hysterics. The supposition is that he boarded the car at Gallion and rode to this city, dropping the boxes of shoes out when nearing the city limits.

The indications are that Narrance's letters will have to be addressed care of Sheriff Rice for some time, unless he is able to put up a pretty stiff bond for his appearance.

Telephone via the Mail Service.

[Columbus Journal.]

It is given out at Washington that Postmaster General Wilson in his annual report will recommend the appointment of a commission to thoroughly investigate the feasibility of adopting the telephone as an important adjunct to the mail service. Those who have made the matter a close study declare that the telephone can be brought into such universal use as to practically curtail the mail service of the country and at a cost not to exceed the present rate of postage. The plan does not involve government ownership of the telephone lines, but the making of contracts with the private corporations or carriers, to handle the public business the same as it contracts with railroad companies and coach lines to handle its mails. The government will sell stamps at a popular rate, say 2 cents for a single telephone message, or 5 cents for a message and return, the public having the advantage of a uniform rate at all points.

The advantage to the public of bringing the cost of telephone messages down to the level of a postage stamp scarcely needs elaboration. It is claimed that it will revolutionize the whole business and social structure, just as the adoption of cheap postage brought the people closer together and the advent of railways and telephones ushered in a new commercial era.

It is a significant fact that the post-office records show that the advent of long-distance telephony has already resulted in a falling off in the use of the mails between certain points. This is especially true where the cities affected are close together, and the telephone rate has not been made prohibitory by the Bell company.

An instance is furnished by the long-distance telephone service between New York City and Elizabeth, N. J., that nets the Bell company \$15,000 a year at the rate of 25 to 35 cents per single message. Between these points 1000 letters are carried daily, which at the 2-cent rate make a gross revenue of \$40 per day or \$14,600 per year. An investigation shows that with the present high rate of telephone service between distant points, the receipts of the telephone corporations have increased, while the mail service has steadily decreased, and it is believed by those who have made close observations that a paying business to the government could be worked up at the present letter postage rates.

Of course the contemplated plan would have to be elaborated and worked out in detail, and that is being done by the telephone officials at the request of which will probably be presented in the forthcoming report to the president.
